EDUCATION

Florida Atlantic University — Bachelor of Science in Computer Science | GPA: 3.79
Boca Raton, FL | Expected Graduation: May 2027
Relevant Coursework: Web Programming, Artificial Intelligence, Principles of Software Engineering

TECHNICAL SKILLS

Languages: JavaScript, Python, C++
Frontend: React.JS, Tailwind CSS, HTML/CSS
Backend & Databases: Node.JS, Express.JS, Flask, MongoDB
Tools: Git, GitHub, GitHub Actions, Render, Netlify

PROJECT EXPERIENCE

Draw & Guess | React, Node.js, Express.js, MongoDB, Tailwind CSS [Live] [GitHub]

- Built a real-time multiplayer drawing game with Socket.IO, supporting up to 8 players per room, supporting lobby creation, live chat, and configurable rounds.
- Created an interactive drawing canvas using the HTML5 Canvas API and React, optimizing pointer-event listeners to handle cross-device stroke synchronization.

Budget Cash | React, Node.js, Express.js, MongoDB, Tailwind CSS [Live] [GitHub]

- Developed an expense tracker that allows users to log, edit, and categorize their expenses.
- Designed a visual dashboard with Chart.JS analytics to allow users to visualize spending habits.
- Implemented server-side Gemini AI for category suggestions and spending insights with rate-limiting and caching.

Task Manager | React, Node.js, Express.js, MongoDB, Tailwind CSS [Live] [GitHub]

- Designed a backend with Node.js and Express.js to handle CRUD operations for tasks and implemented MongoDB schemas to optimize data retrieval.
- Deployed the application to Render with JWT authentication, per-user MongoDB persistence, and a single-server production setup serving the React build via Express.

Portfolio Website | React, Node.js, Tailwind CSS [Live] [GitHub]

- Designed and built a responsive frontend-only single-page portfolio website with React and Tailwind, showcasing past projects, filterable skills, and a contact form.
- Deployed a single-page application with live links to projects and GitHub repositories.
